TABUGBO CHIAGOZIEM FAVOUR

Web3 Data Analyst | On-Chain Analytics | Blockchain Investigations
Lagos, Nigeria | favourtabugbo@gmail.com | +234 901 352 4153
Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Web3 data analyst working in on-chain analytics and protocol research since 2023. Builds live dashboards and investigations from public blockchain data, including Dollar Rails, a multi-chain stablecoin dashboard covering 14 stablecoins across 14 chains, and a transaction-level trace of the Tron side of the October 2026 Binance hack that identified 9 receiving addresses absent from the FBI's published list. Publishes the method and the limits with every finding. Brings lab-grade analytical discipline from biochemistry and pharmaceutical quality control, and hands-on customer support experience helping Web3 users resolve transaction, wallet and account issues.

AREAS OF EXPERTISE

• Core Competencies: On-Chain Data Analytics, Blockchain Fund Tracing and Investigations, Dashboard Development, Data Visualization, Protocol Testing and UX Reporting, Research Writing.

• Customer Support: Web3 user support, troubleshooting transactions, wallets and accounts, issue triage and escalation, documenting recurring issues, clear written communication on Discord and Telegram.

• Platforms and Data Sources: Dune Analytics, Blockscout, Arkham, Glassnode, DefiLlama API, CoinGecko API, public RPC nodes, MS office Suite.

• Technical: SQL (DuneSQL), Explorer, JavaScript and React, working knowledge of Python.

PROFESSIONAL EXPERIENCE

On-Chain Data Analyst | FaveDigitals (Independent) | 2024 – Present

• Built and launched Dollar Rails, a live dashboard tracking 14 stablecoins worth $272.1B across 14 chains using only free data (DefiLlama, CoinGecko, public RPC nodes, Blockscout, Tronscan), with the methodology for every metric documented on the dashboard.

• Showed that Ethereum and Tron hold 83% of tracked stablecoin supply while payment-sized transfers cluster on low-fee chains (median filtered transfer $27 on Solana vs $324 on Tron); measured issuance as daily supply change to avoid USDT and CCTP mint-counting errors.

• Traced the Tron side of the 29 October 2026 Binance hack transaction by transaction: linked 222 wallets, mapped 684.6M TRX (about $205M) paid out in 1,112 payments, and identified 698 THORChain deposits naming 9 Ethereum and Bitcoin receiving addresses not on the FBI's published list.

• Built and deployed the ADI Chain Live Dashboard (React, Vite, Chart.js, Tailwind CSS) integrating the Blockscout API, chain RPC and CoinGecko market data; rebuilt the data layer to fix sync and timeframe-granularity faults.

• Published an ADI Chain overview dashboard and a 20-query DuneSQL study of the L0st N F0und (LNF0) NFT collection on Dune Analytics.

• Authored stablecoin revenue-defensibility research introducing a decision-point concentration framework, with case studies on USDT, Ethena USDtb, Hyperliquid USDH and MakerDAO.

Protocol Tester and Community Ambassador | Independent | 2023 – Present

• Tested 50+ DeFi, Layer 2 and AI protocols, including zkSync, Starknet, t3rn, XION, Somnia and Momentum on Sui; documented functional and UX issues as structured reports for project teams.

• Supported users of Union, Somnia and other testnet platforms on Discord and Telegram, resolving questions about transactions, wallets, accounts and product features and escalating unresolved technical issues.

• Logged recurring user issues and friction points and turned them into input for documentation, user education and product feedback.

• Deployed and tested a smart contract on Circle's Arc testnet using Foundry to evaluate developer tooling.

Event Coordinator (Co-organiser) | BlockFest Africa | 2025

• Co-organised a major African blockchain conference, coordinating logistics, stakeholders and on-site operations.

ADDITIONAL EXPERIENCE

Laboratory Analyst (QA/QC) | Emzor Pharmaceutical Industries, Lagos | Jan 2026 – Oct 2026

• Perform quality-control analyses and keep accurate, audit-ready test records in a regulated pharmaceutical manufacturing environment.

EDUCATION

B.Sc. Biochemistry, Second Class Honours (Upper Division) | 2020 – 2024

Chukwuemeka Odumegwu Ojukwu University (COOU), Nigeria
